Hey David,

They will be reviewing it and letting me know if they need to discuss. I'm sure they will want to have a call once they get a chance to look at our comments.

Thanks,
Mike

Hi Mike

Have they responded or want to discuss them? I have some concerns about their proposed method for hexchrome – I prefer 7199 rather than 7186. When I was at Cal/EPA and worked on some PG&E sites, we performed a comparison study for water and soil with 7186 and 7199. The results were very clear – 7199 was much more reproducible and consistent compared to 7186. The PG&E Hanford site ended up in court and 7199 data was use in the enforcement actions.

david

Mike
Have you passed our comments on to Rous concerning the background sampling?
